

WHAT'S NEW IN THIS VASL VERSION – VASL6.7.2-beta1

Bug Fixes

- Fix 1: Fixed several Null bugs causing VASL to crash.
- Fix 2: Fixed bugs when adding overlays via boardpicker.
- Fix 3: Fixed Board data bug causing VASL to crash.
- Fix 4: Fixed OBA Window bug causing VASL to crash.
- Fix 5: Fixed ROF Die bugs causing crash.

Improvements

- Improvement 1: Selecting Preserve Board Elevation when adding Overlays in Boardpicker now works better with LOS and changes are stored in the .vsav file and will persist across sessions.
- Improvement 2: Draggable Overlays (under the Orchard Button on the Toolbar) now work with LOS (EXC: Deluxe Draggable Overlays).
