

WHAT'S NEW IN THIS VASL VERSION – VASL6.7.1-beta2

Counters:

Fix 1: Fixed problems with concealment/mini-concealment counters.

Fix 2: Fixed reverse side of PF counters disappearing.

Fix 3: Fixed invisible "small" translucent Sniper counters.

Fix 4: Fixed Russian SU-76m not showing as open topped.

Fix 5: Fixed German Opel Blitz wreck not showing.

Fix 6: Fixed color mismatch of label text on customizable American blank counter.

Fix 7: Fixed smoke exponent for American 7-4-7 'E' Squad.

Play:

Improvement 1: Added LOS Checking to HASL bdDaE.

Setup and System:

Feature 1: Font required for updated (SVG) counter graphics is now included in the VASL VMOD, no need to separately download and install the font.

Improvement 2: Changes to autosave feature so that users can select what directory files will be save to. Also changed how games are saved so that they do not get added to the recent games tab.

Thanks to Gordon Molek for his extraordinary work on the SVG graphics and to Joseph Larochelle.
