WHAT'S NEW IN THIS VASL VERSION – VASL6.7.4-beta6

Bug Fixes

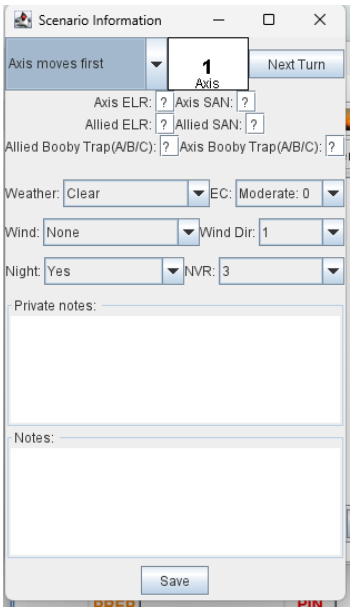

Fix 1: Ammo Depletion display now turns off.
Fix 2: Counter corrections: German and Waffen SS FlaK 30 and FlaK 38.
Fix 3: Enable clearing of "Moved" flag for GE '42 DB.

Improvements

Improvement 1: Add "Broken Ground" draggable overlays and improve "Broken Ground" artwork.
Improvement 2: Updating various "shared" vehicle counters (bicycles, motorcycles, horses, etc.) to reference the SVG versions of the counters.
Improvement 3: Ammo Shortage and Low Ammo warnings in Chat.

Features

Feature 1: LOS Checking in Night Scenarios; *fixed missing Gunflash counters*

Until VASL-6.7.4, VASL checked LOS at Night as if it were day, ignoring NVR restrictions and the effect of Illumination and gunflashes. VASL6.7.4 introduces new functionality to check LOS in accordance with the Night rules. NVR and other night settings will persist from one session to another.

To enable this functionality, new information is now entered and displayed in the Info window.

The Night dropdown should be set to Yes and the NVR should be the current NVR (changes to the NVR can be made during play and will take effect immediately). Be sure to click Save at the bottom of the window!

Draw LOS strings as normal and the rules covering NVR and Illumination and gunflashes should be applied to the LOS result.

Compatibility Notes

Minimum Version Required: Built with VASSAL 3.8.0
