

WHAT'S NEW IN THIS VASL VERSION – VASL6.7.1-beta6

New Features

Bug Fixes

Fix 1: Revised LOS code for Cropping and Flipping

NOTE: this code will only work with geo maps - both the 33 x 10 hex and 17 x 20 hex sizes. It will not work with ANY HASL maps, including those which previously supported LOS. Normal service will resume shortly once this set of code changes has been proven.

None of the changes have caused games to crash during testing to date. All that will happen is that the LOS Engine will fail when a game is opened if a bug is encountered. It will be safe to continue to play but only the basic VASSAL LOS string will display.

Improvements

Compatibility Notes

Minimum Version Required: Built with VASSAL 3.7.16.
