

WHAT'S NEW IN THIS VASL VERSION – VASL6.7.4-beta5

Bug Fixes

Fix 1: Fixed Orchard to Olive Grove transformation on Orchard overlays

Improvements

Improvement 1: Added preference to set opacity of counters during LOS checks.

Features

Feature 1: LOS Checking in Night Scenarios; *fixed missing Gunflash counters*

The screenshot shows the "Scenario Information" window in the VASL software. It has a title bar with a standard Windows icon, a minus sign, and a close button. The window contains several settings: "Axis moves first" with a dropdown set to "1" and a "Next Turn" button; "Axis ELR:" and "Axis SAN:" both with question mark icons; "Allied ELR:" and "Allied SAN:" both with question mark icons; "Allied Booby Trap(A/B/C):" and "Axis Booby Trap(A/B/C):" both with question mark icons; "Weather:" set to "Clear" and "EC:" set to "Moderate: 0"; "Wind:" set to "None" and "Wind Dir:" set to "1"; "Night:" set to "Yes" and "NVR:" set to "3"; a "Private notes:" text area; and a "Notes:" text area. At the bottom is a "Save" button. The window is partially overlapping other windows, with "DEED" and "PIN" visible at the bottom.

Until VASL-6.7.4, VASL checked LOS at Night as if it were day, ignoring NVR restrictions and the effect of Illumination and gunflashes. VASL6.7.4 introduces new functionality to check LOS in accordance with the Night rules. NVR and other night settings will persist from one session to another.

To enable this functionality, new information is now entered and displayed in the Info window. This window will automatically open when (a) Night is turned on or (b) a new game using Night is opened on VASL, and can be opened by clicking the INFO button as normal.

The Night dropdown should be set to Yes and the NVR should be the current NVR (changes to the NVR can be made during play and will take effect immediately). Be sure to click Save at the bottom of the window!

Draw LOS strings as normal and the rules covering NVR and Illumination and gunflashes should be applied to the LOS result.

Compatibility Notes

Minimum Version Required: Built with VASSAL 3.7.27
